

## Join Miramar Ranch Elementary's **FIRST LEGO League Club**

Does your child love robots? Is he or she a Master Builder with LEGO's?  
Want to join the most constructive after school program around?

**FIRST** LEGO League can help your child develop better problem solving skills and create excitement with science and technology using LEGO's Mindstorm software and EV3 Robots!

### **Please attend our Meet & Greet**

**Tuesday, May 2<sup>nd</sup> from 6:30 to 7:30 pm**

- get answers to your questions about FLL
- watch an EV3 Robot demonstration
- join and/or form your own team!

FLL teams are composed of up to eight children with two volunteer Coaches. FLL Coaches and Co-coaches do not need prior technical experience but **must pass FIRST's on-line screening process**. In FLL, the children do the work! Programming an autonomous robot to score points on a thematic playing surface or creating innovative solutions to a problem, kids work together while guided by FLL Core Values. Three elements - the Robot Game, the Project, and the FLL Core Values - make up the yearly Challenge. Teams may also attend an official FLL Tournament, which is hosted by the *FIRST* LEGO League Partners. FLL is open to girl and boy MRE students who will be in the Fourth and Fifth Grade in Fall 2017. **Volunteer coaches are needed** and must pass *FIRST's* requirements. FLL acts as a Club and is financially supported by its members and other donations. Fees are subject to funds and materials at hand and are non-refundable.

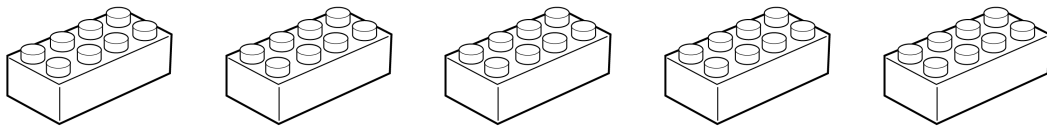

**FIRST = For Inspiration and Recognition of Science and Technology**
