

**Do you have “mad” web skills, like:  
web design, HTML Coding, website management & security ...**

**or do you have a rudimentary knowledge  
but would like some hands-on training?**

**The MRE website uses “Weebly,” an easy to use website builder  
that incorporates drag & drop page building.**

**Do you have a couple of hours each week to help update  
and maintain the MRE website, so that our FFA  
can continue to support the day-to-day fundraising effort  
in support of all of our students? If so,  
then the job of MRE Webmaster is for you.**

**Please contact [mrevolunteercoordinator@gmail.com](mailto:mrevolunteercoordinator@gmail.com) if you can help.**
